 **The Outbound Ghost** | OUT NOW (Link in ... @OutboundGh... · Dec 1 · ...

Regarding the Nintendo Switch, PlayStation 4, and PlayStation 5 release of The Outbound Ghost.

I am so incredibly disappointed and I will do everything in my power to do what's right.

For now, if you want to play the game, the Steam version is the one that I have approved.

The Outbound Ghost released on PlayStation 4/5 yesterday, and on Nintendo Switch today. I have already received worrying messages concerning its performance. I never wanted this version of the game to come out but due to circumstances out of my control, this is the one that was released. I am doing everything that I can to get the relevant parties to fix their mistakes, and I will keep you all up to date as much as I possibly can.

In case you missed it, this was my statement regarding the console versions of the game.

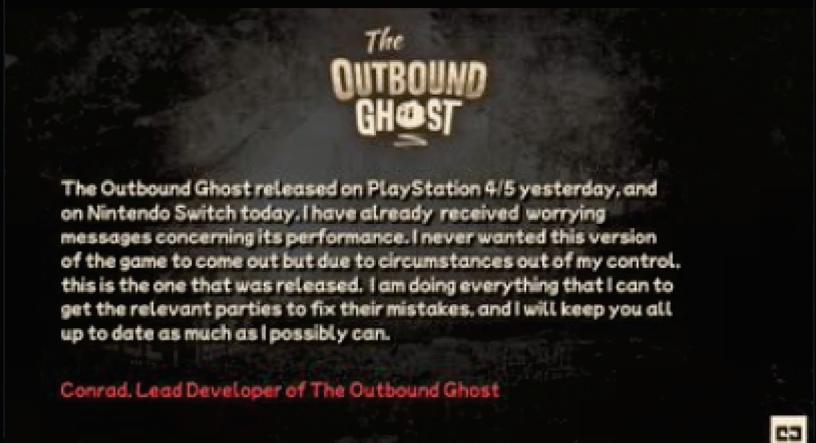

Please give the original post a retweet so that everyone affected can see it. This isn't what I wanted, I never played/approved this version of the game.

Another statement regarding The Outbound Ghost.

For everyone's information, the game has been put on sale on Steam as of yesterday. This was just 6 days after the last sale. This was not my doing.

The Outbound Ghost's current sale is not authorized by me, the developer.

I am doing everything I can to take appropriate action. The tweet below contains my original statement regarding some of the recent issues. Please retweet this and that post so that everyone that has gotten a bad impression of these business practices knows that this was not my doing. I did NOT authorize this.
